To be accomplished as BSP Awardee:

1. Discuss issues and concerns dealing with effective resource management and mitigation strategies in connection with impacts of climate and environmental changes.
2. Assess the impacts of climate and environmental changes on Philippine natural resources with emphasis on Forestry and Agriculture, identify the techniques and technologies that have been employed to mitigate or avoid these impacts, and to further identify gaps that can be filled to make responses to these impacts more effective.
3. Explore opportunities for collaboration and program development that enable the Philippines to more effectively manage its natural resources and mitigate or reverse the negative impacts of climate and environmental change
4. Conduct seminar workshop for LGU officials.
5. Conduct lectures in selected College of Forestry and Natural Resources (CFNR) courses.
