

Mango: Design and Mechanized for Improvised Bagging

Duration: 2022 - 2024

Host Institution: The Philippine Center for Postharvest Development and Mechanization - Cordillera Administrative Region (PhilMech-CAR)

Project Description

PhilMech CAR is mandated to generate, extend and commercialize appropriate and problem oriented agriculture and fishery postharvest and mechanization technologies. In this specific program, PhilMech aims to develop and improve soybean harvesting and mango post harvesting in the region.

Experts Needed

- Agriculturist
- Agricultural Engineer
- Develop and Design Agricultural Machinery Expert
