

Forest Products Nanotechnology

Duration: 2022-2032

Host Institution: DOST - Forest Products Research and Development Institute (FPRDI)

Project Description

Project 1:

Development of nanomaterials from carbonized biomass waste for superconductor and other electrical applications

Project 2:

Development of nanomaterials from biomass residues for biomedical applications

Experts Needed

Project 1:

- Electrical Engineering
- Physics Expert

Project 2:

- Medical Related to the project
