

Sunshare: A Renewable Blockchain Marketplace App for Clean Community

Duration: 2022-2023

Host Institution: University of the Cordilleras

Project Description

The main objective of this project is to develop a blockchain marketplace application where users can buy and sell renewable energy from their community with the help of blockchain technology with the specific objectives:

- To improve the processes of the energy marketplace through the integration of blockchain technology
- To develop a small-scale microgrid in a university campus level as a proof-of concept
- To design the overall model of the project
- To design the features of the project
- To measure the extent of usability of the project
- To deploy the project

Expertise Needed

- Blockchain Technology
- Software Development
- Business / Financial Expert
