

Copper Hydrometallurgical and Solvometallurgical Extraction from Sulfides and Oxides (Cu-HySolvEr)

Duration: 01 January 2023 – 31 December 2024

Host Institution: UP Department of Mining, Metallurgical and Materials Engineering (DMMME)

Project Description

The project aims to assist in revitalizing the copper industry by providing an alternative processing route for copper extraction from ores in the Philippines. This project is under the program AACT: Alternative and Advanced Copper processing Technology which addresses the strategic vision for the copper industry that is "Full integration of copper industry in the Philippines from mining to manufacturing by 2030"

Expertise Needed

- Extraction of high grade copper from sulfides and oxides using hydrometallurgical and solvometallurgical extraction method
