

Establishment and Operationalization of Integrated Research and Development Laboratory (IRDL)

Duration: 15 January 2022 – 14 January 2024

Host Institution: University of Antique (UA)

Project Description

This project seeks to capacitate the university, students, faculties, researchers, government agencies, and private industries in the province of Antique in their research and analytical testing needs through the establishment and operationalization of the IRD Laboratory in the University of Antique (UA). IRD Laboratory is envisioned to be the first testing laboratory in the province of Antique with advanced equipment and testing capabilities in the field of food, nutrition, and environmental science and will serve as a hub for knowledge generation, transfer of technical skills, creation of patentable products and processes.

Expertise Needed

- Field of Food Science and Food Chemistry which also tackles food waste utilization and food product standardization from agriculture and aquaculture products
